**Date:** Wednesday, October 18, 2017 4:35:15 PM

---

Lydia,

Please add the sample analysis report to SDMS for San Jacinto (removal evaluation). Let me know if you have any problems with downloading it.

Thanks,

Gary Miller

**Subject:** FW: San Jacinto Sediment Sample Results

Mr. Edlund,

The link below and the attached link provide access to the unvalidated results of sediment sampling requested by USEPA to confirm that there have been no releases from the northwest part of the cap as a result of Hurricane Harvey. The sampling was conducted in accordance with your letter dated September 29, 2017 and the September 29, 2017 approval of the Sediment Sampling and Analysis Plan by USEPA. The results are all well within the range of concentrations of dioxins and furans in sediment observed in this area prior to the storm, and confirm that no release has occurred from the cap as a result of the storm.

Thank you,  
David Keith
